SKILLS

Frontend & Backend: HTML5, CSS3, JavaScript, TypeScript, React, AngularJS, Node.js, Express, Laravel, .Net.

Infrastructure & Networks: Systems Administration, Network Architecture, TCP/IP, DNS, IT Security & Support.

Databases & Tools: MongoDB, MySQL, PostgreSQL, MERN Stack, RESTful APIs, Git, Automation Scripting.

Enterprise & Emerging Tech: AI Integration, ERP Platforms, Digital Marketing Systems, Tech Project Management.

EDUCATION

Wollo University (2022 – 2026)

B.Sc. Computer Science

CGPA: 3.25/4.0

LANGUAGES

Amharic – Fluent

Oromo – Fluent

English – Intermediate

PROFILE

Computer Science graduate with a versatile foundation spanning Systems Administration, Network Engineering, and Full-Stack Web Development. Combines technical expertise in network architecture and database systems with practical capabilities in building web applications, deploying AI-driven automation, and managing enterprise and business systems, including ERP platforms and digital marketing systems. Highly adaptable, tech-fluent, and skilled in Tech Project Management and modern IT infrastructure workflows, eager to contribute operational efficiency and technical agility to a global technology team.

INTERNSHIP EXPERIENCE

IT & Software Development Intern | Mada Walabu University Computing College June 2025 – August 2025.

- Developed secure Laravel and MERN stack web applications integrated with PostgreSQL/MySQL databases.
- Assisted with systems administration, network architecture maintenance, and TCP/IP/DNS configurations.
- Leveraged AI integration and custom automation scripting to optimize infrastructure workflows.

Full-Stack Developer Trainee | Qiyas Advanced Digital Skills Program (AAU / MoLS) | May 2026 – Present.

- Engineered scalable frontend features and robust backend services using modern web frameworks.
- Optimized relational and non-relational database designs, query performance, and data mapping.

PORTFOLIO EXPERIENCE

- Ethio Temhert LMS: Digital course delivery and student engagement platform.
- Farmer-to-Market (AgriTech) Platform: Direct-to-consumer agriculture marketplace connecting local farmers directly with consumers.
- Eleni Epoxy: Custom resin art & decorative floor e-commerce and logistics platform.
- MERN Blog Application: Full-stack dynamic blogging platform with user authentication.
- Hotel Management System: Core web booking and internal administrative dashboard.
- AI Object Detection: Real-time tracking application using Python and OpenCV.
- Inventory Management: Stock-tracking utility built on clean OOP principles.

CERTIFICATIONS

- Full Stack Web Development Training – Cursa Platform.
- Full-Stack Software Development – Qiyas Training Program (via Addis Ababa University / Ministry of Labor and Skills).
- AI-Optimized Web Development Workshop – Wrench Wise.
- Food Systems Innovation Challenge 2026 – Wageningen University.
- Technology and Innovation (TechInno) Club – Wollo University.
